Nguyen Thai Huu Huy

Frontend Developer

Tan Binh District, Ho Chi Minh City | huuhuy1801@gmail.com | 0335208171 | github.com/huynth1801 | huuhuy.vercel.app

Professional Summary

Frontend Developer with 2+ years of professional experience building and maintaining production web applications with React, Next.js and Angular. Currently shipping features for a B2B quotation portal used by Client Service teams, with a track record of diagnosing performance bottlenecks and stabilizing bug-prone codebases. Experienced with AI-assisted development (Claude Code, GLM), with full ownership of code review. Seeking a full-time product/outsourcing role, with a long-term goal of becoming a Full Stack Developer.

Experience

Frontend Developer July 2025 – Present
TGM Research *Ho Chi Minh City*

- Develop and maintain features for **OfferModule**, a portal that lets Client Service teams create and send quotations to clients in the market research business.
- Resolved severe performance issues that made the application laggy by tracing bottlenecks in rendering and state handling and refactoring them, delivering a smooth and responsive experience.
- Audited the existing source code and fixed a large number of hidden defects, turning a bug-prone workflow into a stable one.
- Built form-heavy quotation workflows with React Hook Form, Zustand and TailwindCSS.
- Delivered multi-market proposal PDF generation and a quota management dashboard UI; presented the design rationale to colleagues.
- Use Claude Code and GLM to speed up scaffolding, refactoring and debugging, reviewing all generated code before merging.

Frontend Developer September 2024 – May 2025
CAS Corporation *Ho Chi Minh City*

- Built and maintained features for the company's internal CRM web application using Angular, with scalable and modular UI components.
- Developed an OCR (Optical Character Recognition) module that automatically extracts information from scanned documents, speeding up document processing for internal teams.
- Built SEO-optimized landing pages with Next.js to improve organic visibility and search performance.

Frontend Developer (Short-term Collaboration) May 2024 – August 2024
Likelion *Ho Chi Minh City*

- Owned the front end of a real-time internal chat application: message grouping, typing indicators and notifications, integrated with back-end APIs.
- Ensured responsive design and cross-browser compatibility with clean, reusable components.

Game Developer Intern May 2023 – August 2023
Onechain Game Studio *Ho Chi Minh City*

- Developed hypercasual games with Cocos Creator and TypeScript, implementing gameplay mechanics, scoring systems and level progression.

Projects

MyShop – E-commerce Platform | *Astro, React, Spring Boot, PostgreSQL, Stripe* 2026

- Full-stack e-commerce monorepo: Astro 5 + React islands front end, Java 21 / Spring Boot API, PostgreSQL 16, Stripe Checkout payments.
- Containerized with Docker Compose, CI on GitHub Actions, architecture decisions documented as ADRs.
- Live: https://thuyshop.store | GitHub: https://github.com/huynth1801/myshop-astro

Personal Portfolio Website | *Next.js, TypeScript, Three.js, GSAP, TailwindCSS* 2025

- Interactive 3D portfolio with Next.js 16, React 19, TypeScript and React Three Fiber; GSAP, Motion and Lenis for animation and smooth scrolling.
- Tailwind CSS 4 and Radix UI, deployed on Vercel; ESLint, Prettier and Husky enforce code quality.
- Live: https://huuhuy.vercel.app | GitHub: https://github.com/huynth1801/my-porfolio-nextjs

Technical Skills

Frontend: React, Next.js, Astro, Angular, TypeScript, JavaScript (ES6+), HTML/CSS, TailwindCSS, Three.js, GSAP
State & Forms: Zustand, Redux Toolkit, Redux Saga, React Hook Form
Backend & Data: Java, Spring Boot, Node.js, Express, PostgreSQL, MongoDB, SQL Server, Docker
Tools & AI: Git, VS Code, Claude Code, GLM (AI-assisted development)
Languages: Vietnamese (native), English (TOEIC 610), Japanese

Education

Ho Chi Minh City University of Technology – Electronics and Telecommunication Engineering 2018 – 2022
UEH University – Software Engineering 2023 – 2024
